

QUALITY POLICY

The primary goal of the company's top management is to provide services to our current and future partners which includes:

- *reliability*
- *fulfilled customer requirements*
- *the value for money is in correspondence*

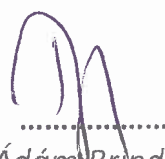

To this end, we are constantly striving to develop and expand our technique and technology.

We make our employees aware that customer satisfaction is the key to the future. This is the number one indicator for judging our work. Enhancing customer satisfaction could be the key to an additional business and motivation to accomplish upcoming challenges.

Based on our aptitudes, we aim to combine the proportion of unique and smaller series of forged products into our product structure, which include high technical content and complete fulfillment of customer expectations.

We all work to provide the right content for our goals by keeping our quality management system under continuous control, realizing our quality goals and increasing the efficiency of our daily work.
